Telesis, LLC recognized as Technology Company to Watch

East Hartford, CT. September 21, 2009 —Telesis, LLC, one of the Northeast's leading software testing companies, was recognized as one of 100 technology "Companies to Watch" for 2009 at the third annual Innovation Pipeline Awards and Technology Showcase at the Omni Hotel in New Haven on September 17, 2009. The Connecticut Technology Council, the State's industry association for the technology sector, annually recognizes companies with sales under \$10M, an innovative product or service, and a business model that demonstrates potential for future success. Telesis, LLC won in the Software Category.

Matthew Nemerson, the CTC President and CEO, notes "we look at hundreds of new ideas and start-ups every year and the companies recognized here are the ones we feel are not only the most exciting, but have a real chance to become fast growing firms."

Awards are the result of a nomination and judging process that engages dozens of technology leaders from corporations throughout Connecticut, such as Pitney Bowes, GE, UTC and Open Solutions, and firms such as law firms Cantor Colburn, LLP, Edwards Angell Palmer and Dodge, LLP and accounting firm Fiondella, Milone, and Lasaracina.

Telesis CEO, Patty Sue Williams, attributes this honor to the excellence of the internal team that created the company's BT3 software and its proprietary methodology, Telesis Advanced Automation Solution (TAAS). "We are thrilled to receive this award and are very proud of the hard work and success we have achieved so far." Telesis clients average an ROI of 89% in reduced testing time and a 350% reduction in business production errors." For more information about Telesis, please visit www.telesisllc.com.

About Telesis, LLC

Telesis, LLC, is one of the Northeast's leading software testing and Quality Assurance companies, with over 350 client engagements. The company specializes in automating the most challenging software testing. In business for over 13 years, Telesis's clients consist of both companies that develop software and companies that implement software that they purchase. www.telesisllc.com

About the Connecticut Technology Council

The Connecticut Technology Council is the state's industry association for the technology sector. CTC's mission is to "connect people, ideas and opportunities to the global technology and innovation community." CTC provides members with business assistance and specialized programs, in addition to promoting and supporting public policies that position Connecticut to have a globally recognized "culture of innovation" that helps attract great ideas and entrepreneurs to in turn develop new jobs and wealth for the state.
