

Telesis Becomes One of America's Fastest-Growing Private Companies

**Telesis Ranks No. 57 out of 100 Computer and Electronics Companies
in the 2008 *Inc. Magazine* 5,000**

Over 145% growth

East Hartford, CT -- August 20, 2008 -- Telesis, LLC, the Northeast's leading software testing and Quality Assurance (QA) organization, announced today that it has been ranked 57 out of the top 100 computer and electronics companies in *Inc. Magazine's* prestigious Inc. 5000, a ranking of the fastest growing companies in the US. The Inc. 5000, an annual awards program, ranks companies by percentage revenue growth over four years. Telesis grew over 145% during that time.

To be considered for this award, a company must be US-based, privately held, for profit, and independent – not a subsidiary or division of another company – as of December 31, 2007. The company must have had a profitable revenue year in 2004 and at least \$2 million revenue in 2007.

According to Inc. 5000 Project Manager Jim Melloan, "The list is the most comprehensive look at a crucial segment of the economy – America's independent-minded entrepreneurs." "Our Inc. 5000 project gives an unrivalled portrait of young, underreported companies across all industries doing fascinating things with cutting-edge business models, as well as older companies that are still showing impressive growth," Melloan observed.

We are extremely proud of this award," said Patty Sue Williams, President and CEO of Telesis, LLC. "Our strong growth is the result of our ability to meet the needs of our clients through the efforts of our committed and dedicated employees," she stated. "With the amount of attention our new software product, BT3, is getting, we are confident that our growth will continue to be strong," Williams added.
